of the Season**

GARRETT GARAGE

FOR SALE—2 five-tube Radios. In Perfect Condition

Our wish to all is health, wealth and happiness, now, and throughout all the coming years.

C. H. NASH

To
Our Old
Friends, Loyal
and true, to valued new
Friendship we strive to serve, do
we most heartily wish unmeasured success and Good Fortune throughout this year and the many years to come. With grateful appreciation for all the Favors received by us from them, and for that Priceless though intangible asset, Your Good Will, which we esteem beyond measure, we wish

You A
Merry
Christmas
And A Prosperous New Year

THE FARMERS' EXCHANGE

FOR SALE

150 tons of prairie hay at Acme, in stack or F.O.B. cars.

J. FISHER WILLIAMS,
319 20th Ave., W.,
Calgary, Alta.

J. W. Deblaquiere expected to leave Saturday to spend Christmas in Saskatchewan.

Mrs. Torrance and children returned on Friday from Calgary, where Marion recently underwent an operation for tonsils.

Geo. Craddock left last week for coastal points.

Mrs. G. Craddock and children left Thursday last to spend a few weeks in Calgary.

Miss O. Charlebois of Calgary, and Mrs. Govin, of Rosebud, arrived in Carbon on Friday and will spend the Christmas holidays at their home here.

J. M. MacDonald leaves on Thursday to spend the holidays visiting with friends in the Crow's Nest Pass.

Word has been received that Mrs. Charlebois was taken to the coast on Friday, in hopes that the change of climate would improve her health.

The Gamble school has received its new piano, purchased through Mr. Bich.

The Tuxis Boys and Trail Rangers wish to thank those who helped to make their play a success.

Jos. Skerry arrived home from Calgary on Monday and will spend Christmas here.

CURLING NOTES

In the Pres. vs. Vice-Pres. draw, the Vice-Pres. was victorious and this year, for the first time in many, we are told, the oyster supper was given the winners, the event taking place in the Carbon Hotel on Monday night.

In the Farmers' Exchange draw, the first game was played on Wednesday night last and Burnett won from Leitch.

Thursday night, Oakley won from Torrance and McGregor from L. Poxon. Friday night F. Poxon won from Greenan and H. Jealous won from Fairbairn, both these games being very close and wins being made on one point in each case.

Smile! All lead pencils do not have concrete erasers. Some Christmas cigars are really fit to smoke!

By buying your Xmas, Cigars and Cigarettes here you are assured of the best brands and Quality.

Take home a box of chocolates with you: from 35c to \$10
Parker Pens and Pencils make an ideal gift for all.

Where service is really given

Canada, the Land of Opportunity

In the year of Canada's Diamond Jubilee draws to a close it is gratifying and inspiring to recall the widespread interest which everything pertaining to Canada now arouses throughout the world, and more particularly in the Empire and the United States. Never before in its history did the Dominion receive more or better publicity than it has enjoyed this year. People in other lands are beginning to get a true conception of Canada and its great possibilities, and possibly nothing is better calculated to spread such knowledge in industrial British circles than the decision of The Financial Times, London, having the largest circulation of any financial journal in the world, to issue semi-annual to page supplements on Canada during the next three years.

In an editorial introduction to the first of these supplements, The Financial Times recalling Sir Wilfrid Laurier's statement: "The nineteenth century was the century of the United States, the twentieth century will be Canada's century," declares that Sir Wilfrid was no mere visionary, as events have proved. It adds: "Unquestionably the nineteenth century was the century of the United States, for America's growth in population, enterprise and wealth were without parallel in the world's history. But the ratios of Canada's progress in the twentieth century were never equalled in any equivalent period of America's nineteenth century expansion. In the past two decades Canada's expansion in all material respects has been prodigious." Supporting this statement, the managing editor, in a signed article, makes the following bald recital of facts setting forth this story of "amazing progress":

In the twenty years' period (1906-1926), there was a 50 per cent. increase in the population, which is now estimated at 8,396,300. At that rate of progression the end of this century should see Canada with a population at least equal to that of Great Britain now.

The value of Canada's field crops saw nearly a fourfold increase in the twenty years' period to \$1,131,241,100. More land was taken up as farms in that period than in the three centuries preceding, yet scarcely half of the possible farm land in the Dominion is yet occupied.

There was more than a fourfold increase in the total trade of the Dominion to \$2,256,029,000. The United States had a population of 75,000,000 before the foreign trade was equal to that of Canada today.

The value of Canada's manufactures was about trebled to \$2,948,000,000. So was the total capital invested in manufacturing industries, which, at the end of 1926, amounted to \$3,371,000,000.

The value of the mineral output showed a 350 per cent. increase, and the ratio of value per capita of population rose from \$12.81 to \$25.69.

Thanks largely to the rapid development of the pulp and paper industry, there was more than a sevenfold increase in the export of forestry products.

There was a 50 per cent. increase in the marketed yield of the fisheries. The value of furs exported showed a tenfold increase to \$17,017,500. When the limit of settlement has been reached there will remain hundreds of thousands of square miles for profitable exploitation by fur traders.

Steam railway mileage rose from 21,353 to 49,552; no other country in the world exceeds Canada in railway mileage, proportionate to population.

Electric railway mileage rose from 814 to 2,500. There are now 63 electric railway companies in operation, with an aggregate capitalization of \$222,000,000.

The number of motor vehicles registered in Canada twenty years ago was under 2,000. In 1926 the number was over 800,000.

Nine times as much electrical energy was developed in 1926 as in 1906 -- the harnessed horse power then being 500,000, against 4,556,000 now. Canada is second only to the United States in turbine h.p. installation, and second only to Norway in such installation per head of population. On a per capita basis the Dominion has nearly five times the installation of the United States. Yet the harnessed horse power of Canada is only about a tenth of her available resources. She has four times as many telephones per capita as Great Britain.

There were fewer than 1,000 bank branches in Canada in 1906; in 1926 there were 3,770. The assets of the Canadian chartered banks in 1906 were under \$800,000,000; in 1926 they were \$2,264,019,200.

The total life assurance in force with Dominion licensed companies in 1906 was under \$700,000,000; in 1926 the aggregate was \$4,609,902,200. The life insurance aggregate rose from \$1,500,000,000 to \$8,045,437,100.

With the eclipse of Russia, Canada has become the second largest wheat producing and exporting country -- second only for the time being to America. The Prairie Provinces alone produce wheat and other crops substantially exceeding in value that of the world's total annual output of gold.

Canadians may well find encouragement and inspiration in such a record of progress to go forward with confidence to the achievement of still greater things for their Dominion in the next twenty year period.

Silver In Canada

British Columbia Is the Largest Producer Of the Precious Metal

Following the discovery of rich silver deposits near Cobalt, Ontario, in 1905 the production of silver in Canada rapidly increased and since that date up to 1925 Ontario was the leading producer. Recent discoveries in British Columbia restored that province in 1926 to the position of leading producer of silver in Canada, when the production exceeded that of Ontario by more than one million ounces. Canada's total production of silver in 1926 was 22,371,924 fine ounces.

Salt In Every Province

Salt, either in natural brines or in beds of rock salt, is found in every province of Canada, although commercial production is confined to Ontario, Nova Scotia, and Alberta.

Plenty of people have a good aim in life, but a lot of them don't pull the trigger.

Soviet Selling Church Bells

Some Of Magnificent Workmanship Being Wanted To Secure Needed Funds

The Soviet Government, being in need of funds, has turned to melting church bells.

A Russian merchant ship docked this week at Havre with a load of bells which had been taken from churches in all parts of Russia.

Though some of them were of magnificent workmanship they had all been shattered and bored with holes, so as to avoid payment of duty, since they were destined to be sold for the metal they contain.

Corns are caused by the pressure of tight boots, but no one need be troubled with them long when so simple a remedy as Holloway's Corn Remover is available.

Insect Gardeners

White ants of Indo-China have their own gardens, where they tend what might be called pumpkin patches. These insect gardeners raise microscopic pellets like pumpkins, made of a sort of fungus, somewhat similar to the mould on stale bread. A bed consisting of fragments of leaves and grass is prepared and weeded by the ants. These they chew into fine material into which they place the germs of fungus.

Reliable Finger Prints

Giving evidence in a court case in London recently, Detective-Sergeant Madden, of the Scotland Yard fingerprint department, stated that his bureau had taken more than 250,000 fingerprint impressions since 1911 without a single error of identification.

Doing Practical Work

Services Of Red Cross Society At Ports Of Entry Is Invaluable

One of the inspiring bits of work carried on by the Canadian Red Cross is known in all its fullness only to those living in the seaport cities -- Quebec, St. John and Halifax. At the nurseries in these three centres, weary women and children are welcomed, warmed, fed and cheered after their long ocean voyage and sent on their way rejoicing to their new homes. Sometimes the adventurer has come to meet a prospective husband, and to go with him to a home on the prairie. Lacking the appropriate bridal outfit, she finds herself embarrassed until the Red Cross workers come to her assistance, provide the things needed, and arrange the marriage.

One of the most appreciated services is the serving of tea to each woman when she arrives. Every cup is a new brew, and in the months from February to October, at least 15,000 cups were given at the three ports.

Conspicuous among the seaport voluntary workers is Mrs. P. J. McMannus, Convener of the Red Cross Seaport Nurseries Committee at Halifax, who is at present in Toronto for the semi-annual meeting of the Central Council, Canadian Red Cross.

At Halifax, from February to October, 165 ships landed, and 6,529 women, 4,349 children and 278 infants received assistance of some sort. At St. John, 2,690 women, 2,738 children, and 238 infants were welcomed, and at Quebec 6,169 women, 9,711 children, and 907 infants. Five hundred and thirteen medical treatments were given.

Paint a Corn With This Marvel Liquid

The pain stops in a few seconds. Tight shoes won't hurt any more. The Corn shrivels up, and drops off. Removes the whole corn and doesn't pain a bit. It's the sure remedy -- Putnam's Corn Extractor. All druggists sell Putnam's Corn Extractor. Get your bottle today. Refuse a substitute for Putnam's.

Australia's Cattle King

Began Career As Teamster Now Owns Thirty Ranches

A man who owns so many horses that he recently destroyed 4,000 of them because he couldn't sell them and they cost too much to keep is, at seventy years of age, visiting London. He is Sir Sydney Kidman, the veteran Cattle King of Australia. He began his career as a teamster at 108 a week. Now he owns thirty ranches covering more than thirty million acres of land; more than 100,000 cattle and 10,000 horses; 1,500 canals and thousands of donkeys and sheep.

CONSTIPATED CHILDREN

Constipation is one of the most common ailments of childhood and the child suffering from it positively cannot thrive. To keep the little one well the bowels must be kept regular and the stomach sweet. To do this nothing can equal Baby's Own Tablets. They are a mild but thorough laxative; are pleasant to take and can be given to the newborn babe with perfect safety. Thousands of mothers use no other medicine for their little ones but Baby's Own Tablets. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Preserving Big Game

Mount McKinley National Park has saved big game in Alaska. Caribou, sheep, moose, and deer, seem to have learned that the park is an absolute game sanctuary and is a safe breeding ground. Those that wander out of the limits may be killed by hunters, who report an excellent year, with good quality of fur.

NUMBER 4087 THE PROPRIETARY

Bank of Montreal Annual Meeting

The annual meeting of the Bank of Montreal brought to a close a year in which the Bank had enjoyed almost record growth.

Sir Vincent Meredith, President, and Sir Frederick Williams-Taylor, General Manager, in their addresses, stressed the rapid strides that Canada was making but struck a warning note against possible over-speculation.

Sir Vincent Meredith in his address, said in part:

Trade conditions in Canada during the year have been active, and while there is still keen competition in many lines, balance sheets generally show satisfactory profits. Manifest evidence supports this statement. Bank debits, bank clearings, bank deposits, car loadings, railway gross earnings, imports, note circulation and lower mercantile mortality all reveal that the tide of business has risen during the year.

Speaking generally, manufacturing industries thrive; textile mills are fully employed; iron and steel operators continue to face strong competition from abroad, as an increasing volume of imports attests; the lumber trade shows a slight improvement; newspaper output increases; production of footwear is larger and the industry is in better state; the manufacture of motor cars has slightly diminished, but in the first nine months of the year 161,583 cars were turned out, having a value of \$105,179,000, or practically the same as in the like period of last year, though the number of cars was 700 less.

I see no reason why an abatement of confidence in the continuance of these prosperous conditions need be apprehended.

Sir Frederick Williams-Taylor, in addressing the shareholders, said in part:

In two fundamental respects, earning power and liquid strength of resources, our position continues highly satisfactory. Never have we been better prepared to care for all the normal needs of the public and to meet any business or financial exigency.

I have referred to the past year as the most expansive in the country's commercial history. That Canadians have experienced a greater degree of individual prosperity than over before is, I think, undisputed. The high general level of employment, and the enhanced spending power of the people, are attributable to a succession of good harvests and to a great broadening of the basis of production. Until a few years ago Canada was best known abroad as an agricultural country, and outside capital sought investment here chiefly in government and municipal issues and in railway building to provide transportation for an ever-increasing agricultural area. Today most of the largely increased capital coming in for investment is for industrial development. It is now fully recognized that Canada has the natural resources for the building up of a vast variety of indigenous industries, and is fitted by the character and spirit of her population to take an increasingly important place among the industrial nations of the world.

Urges Teaching Of Astronomy

Goes Hand In Hand With Industry Says Dr. Ami

In an illustrated lecture by Dr. A. H. Ami, President of the Ottawa Centre Royal Astronomical Society of Canada recently advocated. Dr. Ami pointed to the need of the younger generation acquiring a knowledge of astronomy.

Dr. Ami lectured on the total eclipse of the sun as witnessed by him in England last June. He asserted astronomy went hand in hand with industry, and for that reason young Canadians should have a sound foundation for their work in later years.

Dr. Ami said some inducement should be extended to Canadian scientists so they would not need to seek more remunerative positions abroad.

No More Asthma. Dr. J. D. Kellogg's Asthma Remedy sounds the death knell of this trying trouble. It stops the awful choking and painful breathing. It guards against night attacks and gives renewed ability to sleep and rest the whole night long. Much is claimed for this remedy, but nothing but what can be demonstrated by a trial. If you suffer from asthma try it and convince yourself of its great value.

Gift Pleased Queen Mary

Junior Red Cross Hospital Patients At Calgary Sent Artificial Flowers

Her Majesty Queen Mary, paid signal honor to the Junior Red Cross Hospital in Calgary recently, by causing her secretary to write a very charming letter of thanks for the beautiful bouquet of artificial flowers made for her by the children being treated there, and taken home to her by H.R.H. the Prince of Wales, following his visit to Calgary last August. Mrs. Mable Mappin, teacher of the craft, who is the proud possessor of this letter of thanks from the Queen, reports that each time the Prince has been in Calgary he has taken home a token of this nature to his mother, the Queen.

For Frost Bites and Chills. Chills come from undue exposure to slush and cold and frost-bite from the icy winds of winter. In the treatment of either an excellent preparation is Dr. Thomas' Electric Oil, as it counteracts the inflammation and relieves the pain. The action of the oil is prompt and its application is extremely simple.

Barred From Speed Test

The air ministry is being vigorously attacked for its decision that members of the Air Force will not be allowed to compete in the next races for the Schneider Cup which was won in splendid fashion by the British entries last year. The ministry loves secrecy and dislikes the limelight, and has issued a statement to the effect that its pilots were not intended to be gladiators. It will, however, give every assistance to civilian pilots who wish to compete.

Gambling at greyhound races was ascribed by Roland Wilkinson, a coal merchant of Leeds, England, as the cause of his becoming insolvent.

Minard's Liniment for Grippe.

Part Played By Aviation

Great Strides Made In Flying During Past Seven Years

Aviation is playing a greater part each year in the exploration of the natural resources of the Dominion and also in the conservation of these resources. Air transport is now recognized as one of the methods of solution of some of the most pressing problems of the forester, surveyor, geologist and explorer in their work in the more remote parts of the country. In the past seven years great strides have been made and flying now plays an important part in the work of many Government services.

Has Realized Ambition

Hairdresser In England Always Wanted To Be A Minister

Mr. F. W. Harvey, a hairdresser, of Wallasey, Cheshire, has realized a lifelong ambition by being ordained a deacon and licensed to a curacy.

He has been in business as a hairdresser for twenty-five years. At the age of twenty he was approached with a view to entering the ministry, but family reasons prevented him, and it was not until three or four years ago that circumstances made it possible for him to set about achieving his aim.

Miller's Worm Powders will clear the stomach and bowels of worms, so that the child will no more be troubled by their ravages. The powders are sweet to the taste and no child will object to taking them. They are non-injurious in their composition, and while in some cases they may cause vomiting, that must not be taken as a sign that they are nauseating, but as an indication of their effective work.

Changes Hue After Sunset

It is theoretically impossible for hybridization to produce blue in a flower that is naturally yellow and red, but A. S. Sabbe lately exhibited at Horticultural Hall, London a dahlia that was "a bluey-mauve that turned deep blue after sunset."

Minard's Liniment for Neuralgia.

A mother seal can place her puppy by a hole on a cake of ice and dive off on a food hunting expedition, staying for hours, and can return directly to the cake though the ice may have drifted thirty or forty miles in the meantime.

That eels have immortal souls is a superstitious belief of the Eskimo fishermen.

*Have A Westinghouse
In Your Home for Christmas*

In the home that owns a Westinghouse radio, Christmas cheer does not die with the Yule log embers. Long after other gifts are forgotten a Westinghouse brings countless hours of enjoyment.

Never before have you been able to have such value in radio sets at so moderate a price. The new 1928 Westinghouse models and Radiolas include a set for all methods and requirements of operation. A choice of storage battery, dry battery and socket power operation affords perfect radio enjoyment under all conditions—at a price you can afford.

The performance of these new sets is flawless. Distant stations are brought in loud, clear and without distortion. Their tone is as mellow and sweet as that of an old violin. One dial station selector makes them as simple to operate as turning on an electric light. All console models have the new Oval Cone loud speaker built in. Cabinets are of walnut in pleasing design and finished in Duco.

Decide now to have one of these new models in your home this Christmas. We'll gladly give a demonstration in your home without cost or obligation. Phone us to-day.

WORLD HAPPENINGS BRIEFLY TOLD

Discovery of \$1,000 worth of radium in the Ottawa hospital incinerator terminated a frantic search. It had been thrown away with soiled dressings.

David M. Turnbull, Winnipeg, is this year the successful candidate from Manitoba for the Rhodes Scholarship, tenable for four years at Oxford University.

Turkey's only radio company, founded last March under a monopoly of all radio supplies, closed its service lacking funds because its Scandinavian backers failed.

The U.S. gunboat Sacramento has landed field guns at Canton to protect foreigners. The guns were taken to the U.S. consulate in the Shantung concession district.

William J. Baroni, restaurant proprietor, former stock market page boy and a veteran of the World War, was revealed as the purchaser of a seat on the stock exchange at the record price of \$310,000.

The British Government has made no move to start negotiations with Japan to renew the Anglo-Japanese Alliance, Godfrey Locker-Lampson, under secretary of the foreign office, told the House of Commons.

Announcement is made of the death of Commissioner Elijah Cadman, the first Salvation Army captain, whose adoption of the title led to the present system of ranking members of the Salvation Army.

Notification has been received from Geneva that the international committee of Red Cross Societies has accepted the Canadian Red Cross Society as a member of the international committee.

In confirming the establishment of a Canadian Institute of International Affairs Sir Arthur Currie announced that Sir Robert Borden, former premier of Canada, had accepted the chairmanship of the council.

Claims New Device Neutralizes Gravity

Radio Engineer Of New Jersey Is Inventor

The invention of a machine by which the force of gravity is neutralized is announced by Bernays Johnson, a radio engineer, who claimed that if the machine can be developed to a commercial stage air flight from New York to Paris can be achieved in five or six hours.

At his laboratory in Newark, N.J., Johnson said he had actually suspended a miniature plane in the air by neutralizing gravity and also that he could suspend a fifty pound weight in the air.

Fewer Travelling Men

There has been little notice of the passing of the travelling salesman. Comparatively there are few left. The owner of a wholesale drug house who employed some forty, now has four. Yet his business has grown twenty per cent. Business done secured by these agencies of good fellowship is now accomplished by air mail, telephone and telegraph.

Water-Power Sites in Canada

The developed and undeveloped water-power sites of the Dominion of Canada are estimated to have a capacity of 20,197,000 horse-power under conditions of ordinary minimum flow, or 33,113,200 horse-power dependable at least six months of the year.

Prairie Swine Herds Increase

During the five years between 1921 and 1926 the number of swine on farms in the Prairie Provinces of Canada increased by 547,244 according to the Dominion Bureau of Statistics. The figures for the two census years follow: 1921, 1,655,245; 1926, 1,602,489.

Old Fashioned Christmas

Merry Christmas Is As Merry As Ever
and Its Spirit Is As True
and Earnest

Good old fashioned Christmas cheer, so loudly mourned for in these modern days, is a myth. The new fashioned Christmas is far better, declares the Woman's Home Companion in its December number. "Much has been added and nothing has been taken away unless by our own blindness or folly," it continues.

"Sleigh bells and Yule log, the far, slow plodding over drifted roads to the home of childhood, the groaning board lined with beaming faces, voices lifted in familiar hymns—the old-fashioned Christmas.

"Fast motor cars, rows of city houses heated by oil, families scattered over a dozen states sending quick greetings by wire; a few gathered about a smartly decorated table, the loud speaker filling the room with music from a distant orchestra—the new fashioned Christmas.

"It is easy to draw a cynical contrast. But it is harsh and false as is the way with cynicism and offense our inner knowledge that all is still well in the hearts of the people. Merry Christmas is merrier than ever and its spirit is as true and earnest.

"Children still scream for joy over the thickest gifts. The fingers of age unwrap parcels with ardent undimmed by the years. Funny little springs of mischief still peep above the doorways. From every window wreaths smile at passers-by. The highways even into the country and hamlets are swept, if there has been a fall of snow, and are open to the eager traffic that brings people together. And, for all the bustle of it, men and women pause to think and speak reverently of the Christmas child.

"Never was the world so wide for happiness, never so deep for the current of friendliness. Never so many men of good will, never so ardent a desire for peace on earth, never so many things to make Christmas merry."

Men's and Youths' House Coat

This attractive house coat is a smart and comfortable style, and will be found quite easily fashioned by the home modiste. The two piece sleeves may be finished with shaped cuffs, and a shawl collar. No. 1336 is in sizes 31, 33, 35, 37, 39, 41, 43 and 45 inches breast. Size to requires 2 1/4 yards 36-inch or 2 yards 54-inch material, and 3/4 yard 36-inch contrasting for View A. Price 20 cents the pattern.

Many styles of smart apparel may be found in our Fashion Book. Our designers originated their patterns in the heart of the style centres, and their creations are those of tested popularity, brought within the means of the average woman. Price of the book, 10 cents the copy.

WORLD'S RECORD

E. B. Fink, for 60 years a train dispatcher and telegraph operator, retired from the service of the Canadian National Railways on November 30. Mr. Fink's service is longer than that of any telegrapher in the world. At the time of his retirement he was in the employ of the company in Winnipeg.

Radio Developed Twenty Years Ago

First Broadcast Was Made On December 24, 1906

Radio almost reached its present development 20 years ago. Reginald A. Fessenden, inventor, testified in Boston at the federal trade commission hearing of charges that the General Electric Company, the American Telephone and Telegraph Company and other concerns had combined to control radio and establish a monopoly.

He said the first radio broadcast was made December 24, 1906, when the message "Peace on earth good will to men" was put on the air at Martha's vineyard.

Hoarded Things Shrink

The man that wrapped his talent in the napkin, and said, "Lo, there thou hast that is thine," was too sanguine. There was never unused talent rolled up in a handkerchief yet, but when it was taken out and put into the scales, it was lighter than when it was committed to the keeping of the earth.

B.C. Tobacco For Britain

The first shipment to Great Britain of tobacco grown in British Columbia has been sent forward by W. F. Bremner, who is in charge of the provincial crop. There is a report current that Ontario interests are to build a curing plant at Vancouver to look after the export trade.

SUNDAY SCHOOL LESSON

DECEMBER 25

CHRISTMAS LESSON

Golden Text: "Thou shalt call his name Jesus: for it is he that shall save his people from their sins."—Matthew 1:21.

Lesson: Luke 2:1-20.

Devotional Reading: Luke 2:8-20.

Explanations and Comments

I. The Birth Of Jesus At Bethlehem, verses 1-7.—A decree of Caesar Augustus ordered the enrolment of every one in the Roman Empire. The people of Palestine were enrolled in "their own cities," and therefore Mary and Joseph left their home in Nazareth of Galilee for Bethlehem, which had been the home of their ancestor David. There Jesus was born, and Mary laid him in a manger, because there was no room for them in the inn.

"Though Christ a thousand times in Bethlehem be born,
If He's not born in thee, thy soul is all forlorn."

II. The Shepherds and the Angels, verses 8-14.—God's revelations come to those who are ready for them. It was not to learned rabbis, but to humble shepherds at their accustomed toll that the wondrous news of the birth of the Christ came. They were watching their flock at night in the neighboring fields of Bethlehem, when an angel suddenly appeared to them and bade them fear not as he announced, "Behold, I bring you good tidings of great joy which shall be to all the people." For the four words "I bring good tidings" there is but one word in the Greek, evangelizomai, from which is derived our verb evangelize. And this was the glad tidings: "There is born to you this day in the city of David, a Saviour, who is Christ the Lord." Christos, Christ, is the Greek, as Messiah is the Hebrew, for anointed, the Anointed One. It was the title of Jesus as the One consecrated to be the Redeemer of the world. "He does not simply say, Christ is born, but to you He is born; neither does he say, I bring glad tidings, but to you I bring glad tidings of great joy. Furthermore, this joy was not to remain in them, but it was to be to all people."—Martin Luther.

"Jesus did not just begin to be the Saviour when the shadow of the cross fell upon Him at the end. The Saviour was born at Bethlehem. The hands of the Bethlehem Babe were infant hands, but they were the hands that would afterward be nailed to Calvary's cross. He was not born to make a holiday, but to save the world, and to save it at any cost. Our shallow, superficial, good-natured Christmas festivity is far enough from what Bethlehem meant. Mary knew in part, the Wise Men knew in part, the angels knew in part. The heart of God knew altogether. Perhaps one of our highest services in modern life would be to recover Christmas for Jesus Christ and His real purpose in the world."—William F. McDowell.

Judge: "Have you anything to offer to the court before sentence is passed on you?"

Prisoner: "No, judge, I had ten dollars, but my lawyer took that."

Huge Liner For C. P. R. Launched

With the launching of the new 20,000-ton passenger liner the "Duchess of Atholl" on the Clyde recently, ships with a total of 72,000 tons have been launched for Canadian Pacific service during the months of October and November. This is believed to be a record for a private company.

The "Duchess of Atholl" is the first of four "Duchess" class steamers for trans-Atlantic service being constructed for the Canadian Pacific Steamships. Her Grace the Duchess of Atholl was the central figure at the launching and christening of this

huge palatial liner. A sister ship, the Duchess of Bedford will be launched some time in January, while the two others of the same class will be ready by the summer of 1929. These four 20,000-ton vessels will augment the Canadian Pacific service on the Atlantic between Montreal, Quebec and Old Country and Continental ports. They will represent four of the finest passenger liners afloat and will be the largest to negotiate the St. Lawrence as far as Montreal on regular runs. The general length of the four steamers will be 500 feet over all; breadth 75 feet with a load draft of 27 feet.

**DR. HAMILTON'S
PILLS**
CLEANSE THE SYSTEM

WEALTH OF H. B. AREA

Enormous Mining Development Will Follow Building Of Railway

The whole of Canada will benefit by the opening up of the Manitoba mining area, north of Hudson's Bay railway. This is the conviction of Cyril M. T. Young, F.R.G.S., Toronto, superintendent of development of the Canadian National Railways, who was the speaker at a joint meeting of the Board of Trade and the Young Men's Board of Trade at Winnipeg.

"The country north of the Hudson's Bay line," he declared, "especially along the height of land between the Nelson and the Churchill Rivers in the Sherritt Gordon-Flin Flon section and northeasterly toward Churchill is going to give Canadians another surprise in mining." This, Mr. Young said from his 25 years experiences in mining, forestry and settlement and as a result of a personal examination of the resources of the territory.

Ore in the Manitoba properties was not as high a grade of copper, affording as large a net return, as that of Rouyn, Quebec, he stated, yet measurements and sampling showed that each of the properties had today ore values three times the total of the developed ore in the Rouyn area in 1927, when one takes into consideration the fact that Rouyn traffic has justified the 43 mile Canadian National branch line, said Mr. Young, and that a second railway has been constructed and is now in operation into that camp.

Every province would have its share in the development of the new country, he asserted. It is reasonable to expect, he continued that the coking coal used in the Flin Flon-Sherritt Gordon smelter will come from Alberta, because good coking coal exists on the coal spur branch south of Edson. The metallurgical process being adopted will require salt, which should come from Saskatchewan. The timber requirements for mining work will come from British Columbia. The western meats and other food stuffs and the mining supplies will be shipped from Manitoba and the two sister prairie provinces to supply the towns and cities which will grow up hand in hand with the mining industry and with the allied cheap power and pulp and paper industries on the Nelson river. Mining equipment and electric power machinery will come from the manufacturing centres of Ontario and Quebec.

Recipes For This Week

(By Betty Barclay)

(By Betty Barclay)

CHRISTMAS FRUIT CAKE

- 1 1/2 cups sifted prepared cake flour.
- 1 teaspoon baking powder.
- 1/2 teaspoon salt.
- 1/2 cup butter, or other shortening.
- 1 cup sugar.
- 1/2 cup chopped almonds.
- 1/4 cup grated coconut.
- 1/2 cup citron, cut fine.
- 1/2 cup Sultana raisins.
- 1/2 teaspoon almond extract.
- 1/2 teaspoon vanilla.
- 5 egg whites, beaten stiff.

Sift cake flour once, measure, add baking powder and salt, and sift together three times. Sift 1/4 cup of this flour mixture over nuts and fruits; mix thoroughly. Cream shortening until light and fluffy add sugar gradually and cream together thoroughly. Add remaining flour mixture slowly to creamed mixture. Beat after each addition until smooth. Add nuts, fruit, and flavorings. Fold in egg whites. Pour in loaf pan which has been prepared with a paper lining in the bottom. Bake in slow oven (250 degrees F.) 1 1/2 hours. Make 1 1/2 pounds. For larger cake double recipe and bake in tube pan two hours.

The doctor had two pretty children. One day a woman passing two small boys heard one say to the other:

"Those pretty girls over there are the doctor's children."

"Yes, I know," said the other. "He keeps the best for himself."

The biggest man on earth began life in a small way.

LEVEL CROSSING ACCIDENTS TAKE TOLL OF DEATH

Ottawa.—The level crossing continues to take its toll of death.

Statistics compiled by the railway board show that in November out of 44 crossing accidents, automobiles were involved in 36. Eight persons were killed and 49 injured. Most of the automobile accidents occurred at unprotected crossings.

Comparative figures for the whole year are not yet available, but in the last four months of this year the number of crossing accidents was 135 against 137 in the four months of 1926. Autos, in the 1927 period figured in 123 of the accidents, with 12 fatalities, the same as 1926.

W. L. Best, vice-president of the Brotherhood of Locomotive Firemen and Engineers, in a memorandum submitted to the Minister of Railways, says that within the past six years—1921 to 1926—199 persons have been killed and 1,427 injured at highway crossings.

Mr. Best suggests a number of things to combat the menace of present day automobile traffic on highways that cross railways on the level, chief of his suggestions being separation of grades. Pending complete separation he urges gates, bells or watchmen and further deprecates improvement of highways at approaches to railway crossings, which would force slower traffic and elimination of some of the danger. He also suggests restriction of Federal Government aid to highway construction unless provincial and municipal governments guarantee adequate removal of the level crossing danger.

Mr. Best recommends a conference under the auspices of the railway board to determine a national plan of level crossing separation and protection, and that, if necessary, the Railway Act be amended.

Lindbergh Flies To Mexico

Successfully Negotiates Non-Stop Flight From Washington

Mexico City.—"Lindy" has done it again—he and the other half of the famous "We."

Without stop Col. Charles A. Lindbergh, piloting the Spirit of St. Louis which earlier in the year had carried him to Paris, flew from Washington to Mexico City. For more than 27 hours he was at the controls.

Perhaps there has never been witnessed such a delicious demonstration of joy by a Mexican multitude when, after some three hours of apprehension that misfortune had befallen the flyer, the Spirit of St. Louis settled on Valbuena Military Aviation Field, two and a half miles from Mexico City. Lindy and his "plane" were safe and sound. Nothing was wrong except that a miscalculation of direction carried the plane in a great circle from Tampico into the interior, instead of flying in a direct line to Mexico City.

The lone eagle not only flew over Mexico's mountains and deserts in this first non-stop flight between the two capitals, but he flew straight into the hearts of the Mexican people—beats already long attuned in devotion to him by exploits of which they had read, hearts torn with fear for hours for his safety.

Appointed To Senate

Ottawa.—Hon. Philippe Paradis, a member of the Legislative Council of Quebec, has been appointed to the Senate in place of the late Senator Montplaisir of Three Rivers. He will resign his seat in the Quebec Upper House. Mr. Paradis' appointment has frequently been forecast. For many years he has been the chief Liberal organizer of the Quebec District. He is prominent in the asbestos industry.

Air Mail For Mine Area

Ottawa.—Plans are under way in the post office department for the substitution this winter of a weekly air mail service for the present ten-day dog team mail, to serve Red Lake, Wawan Lake, Wawan River, and Narrows Lake in the mining area of Northern Ontario. Aviation companies have already been approached by the postal authorities, and it is expected that tenders will be let shortly.

W. N. C. 1712

Children Perish In Blaze

Many Die As Flames Sweep Through Orphanage In Quebec

Quebec City.—Fifty children, most of them orphans ranging in age from five to sixteen years, are feared to have been burned to death in a fire which swept suddenly and devastatingly through the Hospice Saint Charles here.

The Hospice Saint Charles, an orphanage conducted by the Nuns of the Good Shepherd, also housed many local children placed there by their families to receive their education, and the parents of those children, crazed by grief, flocked to the city morgue to reckon their dead.

Five hundred children and forty nuns were in the four-story stone-faced building when fire burst out in a dormitory on the second floor. It was believed to have originated in the basement and to have eaten its way to the second floor before discovery.

In a short time the entire building was a mass of flames and doomed to destruction. Efforts of firemen, policemen and the Nuns of the Good Shepherd who conducted an orphanage in the building were directed toward rescue work. A dreadful scene ensued.

Ladders were placed on every side of the building and firemen and policemen carried many children to safety in their arms.

Mingled with the roar of the flames were the terrible screams of the frightened and injured children and those trapped within the structure. Adding to the horror of the catastrophe were the grief-stricken groups of parents who awaited the removal of the children's bodies by the firemen.

Rescue workers made repeated trips at great personal danger into the dormitories, saving as many children as possible before being driven forth by the flames.

Advance In Shoe Prices Is Predicted

Necessary To Meet Production Costs Says President Of Association

Montreal.—At the 5th annual meeting of the Shoe Manufacturers' Association of Canada, President F. K. R. Lanthier, Montreal, told the delegates that both the wholesale and retail trade would find it necessary to advance their shoe prices again to meet the prevailing production costs.

While production has been large during the past year, competition has continued to be exceedingly keen and for the most part shoe profits have been small in relation to the number of pairs of shoes manufactured, said Mr. Lanthier. Imports from the United States and Great Britain showed a marked increase. During the last 12 months, 17 Canadian shoe manufacturing establishments have failed, arranged settlements with their creditors or discontinued business, the president reported.

Distinguished Soldier Dead

General Alderson Commanded First Canadian Division In Great War

London.—General Sir Edwin Alfred Herbert Alderson, K.C.B., commander of the First Canadian Division in the Great War and subsequently the Canadian Army Corps, died at Lovestoft, Dec. 14.

General Alderson gave splendid service throughout the Great War. In connection with his command of the Canadian Army Corps, he was mentioned in despatches and was created a Knight Commander of the Bath and Commander of the Legion of Honor.

He was A.D.C. to Queen Victoria and from 1900 to 1906 was A.D.C. to King Edward VII.

In the Great War General Alderson took command of the Canadian troops from their first arrival in England. Members of the first contingent will remember his reception of them at Plymouth on landing and later at subsequent inspections on Salisbury Plain and in France.

Selling Spring Spinach

St. Catharines, Ont.—Spinach sown this fall by vegetable growers in the Niagara peninsula for marketing purposes next spring, has developed so rapidly that growers have had to cut the crop and sell it. It is the first time on record that home grown field spinach in the Niagara fruit belt has been marketed in December.

Canada At Geneva

Dr. W. A. Riddell, who is acting for Canada in the preliminaries on Disarmament at Geneva.

Britain Paying War Debt

Heavy Payment Is Made To the United States

London.—A payment of \$92,575,000 was made Dec. 15th by the British Government to the United States treasury, of which sum the amount of \$35,000,000 is in payment of the principal of the debt, the balance being interest.

With this payment, the total payments to the United States since the funding of the British debt amount to \$892,580,000, of which \$120,000,000 has been on account of principal.

The amount outstanding has been reduced to \$1,489,000,000.

Athens Forming Senate

Athens.—A bill has been prepared for the creation of a senate which has not existed since 1862. It provides for 50 senators to be elected by the people. Twenty others will be chosen by commercial, professional, scientific and labor organizations, and 10 by the chamber of deputies. Senators must be 40 years old. Their term of office will be three years.

Work On Flin Flon Railway

The Pas, Man.—H. F. McLean and William Tomlinson, who have the contract for the construction of the new road to the Flin Flon mine, have arrived here and are making preparations to start work sooner than was expected. It is planned to lay steel on the ground up to Cranberry Lake, so as to enable contractors to rush in supplies. If this is decided on, 200 men will be needed.

New Calendar Proposal

Fixed Calendar Of 13 Months Is Under Consideration

Ottawa.—Proposals for a fixed calendar of 13 months, each of 28 days, were placed before the External Affairs Department by its author, M. B. Coatsworth New York. Afterwards he saw some of the technical officers of the Government.

In October last the League of Nations called the different Governments which are party to the League, asking them to give its advisory committee on communications "all information of value to it on any action taken on the suggestions contained in the report of the committee of inquiry into the reform of the calendar and more particularly on the national proposal for committees of inquiry to study this reform." Steps are being taken to form such a committee here.

The international fixed calendar would provide for 13 months instead of 12, each month divided into four complete weeks beginning on Sunday and ending on Saturday. An extra month would be necessary and this would be inserted between June and July. Every month of the year, by this plan, would be identical in date and week day names. The last day of the year would be dated December 25th as an eighth day extra Sabbath ending of the last week. In leap year, "leap day" would be inserted as the mid-summer extra Sabbath and dated June 29th.

Gambler's Winnings Will Educate Youth

Texas Cattle Ranch Won In Poker Game Deeded To School

Fort Worth, Tex.—A cattle ranch won in a poker game now is contributing to the education of Texas youth.

The last legal formality has been completed by which ownership of the 6666 ranch is transferred to Texas Christian University of Fort Worth. Mrs. Burk Burnett, widow of the late Captain Burk Burnett, deeded the land to the school.

Captain Burnett named his ranch the 6666 in token of the poker hand of four sixes which brought him the property and elevated him from a cowboy to a cattle baron.

Pool Payment In March

Winnipeg.—No further Wheat Pool payments will be made until March. A. J. McPhail, Regina, president, announced here. The Canadian Wheat Pool Board met here, with members present from Saskatchewan and Alberta, and discussed routine business.

Prize Swine Raisers of the West

Raising hogs that can compete with the best produced in the West is the specialty of these four young men who were winners in Juvenile Swine Competitions in the prairie provinces this year. The competitions, which have become an annual event through the west, are conducted by the Canadian Pacific Railway in order to stimulate the young farmers in prize livestock raising. The young men are, from left

to right: Ivan Graham and William Parr, of Kenton, Manitoba, and Thomas Cunningham and James Clark of Kenmore, Saskatchewan. They were photographed in Toronto while attending the Royal Agricultural Winter Fair as guests of the Canadian Pacific. They spent many interesting and instructive days in that city, taking in the live stock fair, the Zoo, stock yards, packing plants, theatres and other city sights.

PUT A CHECK ON THE SOVIET MENACE IN CHINA

Shanghai.—Dispatches from Canton to various sources indicate that the death toll in the recent Nationalist coup, which were at first stated as probably not exceeding 1,000 will reach 5,000 at least.

Although Nationalist authority has been re-established, police headquarters has not yet been taken. Chinese Reds with a few Russians were found taking a determined stand there.

Disorders continued, but were considerably lessened.

Numerous incendiary fires were burning. An unknown number of Reds have been executed.

Japanese dispatches made (and down revealed countless dead bodies littering the streets. They also say the labor union headquarters were razed and innumerable shops looted. Those few that remained untouched were heavily barricaded. A thousand houses were burned, according to the Japanese dispatches.

While the danger to foreigners is believed to have passed, American naval authorities have given permission to Americans whose homes were in suburbs of the Chinese city to return and armed parties have been withdrawn from shore to their ships. A heavy concentration of foreigners of many nationalities remains in the foreign section.

With the sudden suppression of the disorders in Canton, Nationalist officials here were unanimous in their claim that there was no danger of a further Red uprising. Military officers declared the Nationalists are amply prepared to prevent a recurrence.

The Nanjing Nationalists have launched a campaign against alleged Russian influence in Chinese affairs. Chiang Kai-Shek, head of the Nationalist Party, today reiterated a statement condemning the Soviets. He declared that "Soviet consulates throughout China have been serving as hotbeds of Communist propaganda, necessitating immediate severance of diplomatic relations between China and Moscow. Communism is bound to cause the breakdown of the Chinese revolution. Some time ago I recommended that the Kuomintang (Nationalist Party) break off relations. If action had been taken then the Canton disaster probably never would have happened."

Chiang Kai-Shek repeated a statement that the Kuomintang executive committee had instructed Foreign Minister C. C. Wu to inaugurate moves looking toward severance of relations, but that the minister had not had time to carry out his instructions.

Will Be Ready In Time

No Delay In Completion Of Flin Flon Rail Line

Montreal.—Sir Henry Thornton, asked as to the Flin Flon development in Manitoba, said the railway would be completed in "ample time to meet mineral developments in that district."

Speaking of conditions in Mexico, where he has just visited, Sir Henry stressed the need of tranquillity to give time to make the country prosperous, promote education, and put the railways in a sound financial position.

The Curse Of Tipping

Vancouver.—"Tipping is the curse of the catering business from the waiters' point of view," said P. Bonaldi, Vancouver, before a session of the minimum wage board. Waiters in one of the city's largest hotels have not received more than \$1.30 per day in wages at any time within the past 29 years, said G. Coleman. They are compelled to get a living wage by studying the possibilities of their customers and means of extracting money from them in tips.

Smothered In Grain

Fort William, Ont.—Joseph Bonaldi, 28, father of five children, was smothered to death in a bin of the Grand Trunk Pacific elevator here today. Bonaldi was engaged in evening grain at the bottom of the bin and it is believed that as he reached the bottom the grain slid, covering and smothering him.

Make Aerial Survey Of The Immense Grazing Lands Known As Wood Buffalo Park

Great expanses of grazing lands, numerous hitherto unknown lakes, and stretches of heavily wooded country were revealed by aerial photographs taken during the past season from planes engaged in a survey of the southern half of Wood Buffalo Park near Fort Smith, Northwest Territories. The information made available by this aerial survey will prove of importance in studying the capability of this great range to provide feed, water, and shelter for the future development of the buffalo herds which now roam its expanse of 17,300 square miles. Owing to unfavorable flying conditions the entire reserve could not be photographed and only the southern portion was surveyed this year.

The Wood Buffalo Park, which lies on each side of the boundary line between the Northwest Territories and the province of Alberta is administered by the North West Territories and Yukon Branch of the Department of the Interior, and at the request of this branch, the survey work was undertaken by the Topographical Survey of the same Department in cooperation with the Royal Canadian Air Force of the Department of National Defence. The greatest dimensions of the park are approximately 175 miles north and south and 150 miles east and west.

The nearest post is Fort Smith, N.W.T., just north of the territorial-provincial boundary. In the area occupied by the park the last remaining bands of wild wood buffalo were discovered many years ago and these are now estimated to have increased to about 1,500 animals. Since 1925 to this date have been brought the overflow from the herd in Buffalo National Park, with a gain of nearly 6,000 more—so that the total number, making allowance for natural increase, is now in the vicinity of 8,000.

The aerial survey of Wood Buffalo Park when completed, will be one of the largest yet undertaken and is the farthest North survey of its kind on this continent. The season's operations were carried out with two Viking seaplanes, each carrying a pilot, a photographer, and a surveyor-navigator. The home base of the planes was at Ladder Lake, Saskatchewan, and they were flown to the local base at Chipewyan at the West end of Lake Athabasca, a distance according to the water route followed of roughly 500 miles. The West end of Lake Athabasca forms part of the Eastern boundary of the park so that Chipewyan is situated virtually on the edge of the reserve.

Previous to the survey the great stretch of country lying between the Peace River and Great Slave Lake, West of Slave Lake, which includes the major portion of the park, had to a large extent remained terra incognita. This was due to the fact that it is almost lacking in navigable rivers and much of it is timbered plain of little relief in which the ground observer can seldom get an extensive view. Only a few old Indian trails give access to the interior.

From an aeroplane at a height of 5,000 feet the country spreads out to a horizon sixty miles away with clear detail. The cameras have accurately recorded all the water areas. The fall and winter range of the buffalo stands out clearly; the heavily wooded rolling country and the spring and summer feeding grounds are also recognizable on the photographic prints. A third class of country in which the swampy areas shade to the highlands is also shown. This country is nearly flat with low islands and on it drainage is poor and mires accumulate. Although such land does not furnish much pasturage it serves the useful purposes of conserving the water supply and forming a natural floodguard.

The examination of the photographs of the southern half of the park covered by the work of the past season reveals a great many previously unknown lakes, relieving any apprehension of water shortage. Valuable data on the situation as to pasturage and road location may also be obtained to assist in the administration and development of the park.

Photographs taken at 5,000 feet are on too small a scale to show animals

but the officers in charge of the ground control operations reported that they saw a number of buffalo which were in good condition and evidently thriving. This confirms the reports received from wardens by the North West Territories and Yukon Branch, which is in charge of the park, to the effect that the different herds and shipments were getting along peacefully together and that all were thriving.

Romance Of Early Trading

Days When Records Were Written and Kept On Buckskin

Romance of the early trading posts of Northern Quebec is entwined in a claim advanced by Mrs. Jane Peever, 87, of Burnaby, for one third of a fortune in chancery said to amount to nearly \$200,000,000.

The days when important records were kept in the wilds by writing on dressed buckskin are recalled by her statement that James Hudson, believed to have died intestate, actually left a buckskin will bequeathing his estate to his family.

This will written on a strip of buckskin 24 inches broad, was in the possession of Samuel Frost at Fort Coulonge, Que., 10 years ago, according to a statement by William Osborne Peever, 50, Vancouver, who declares he read it.

Wood Buffalo Are Thriving

The wood buffalo in their natural habitat in Wood Buffalo Park near Fort Smith, N.W.T., continue to thrive and multiply. The buffalo in the southern range within Alberta are intermixing with those of the plains shipped during successive seasons since 1925 from Wainwright Park, Alberta.

There are 1,310 flour mills in Canada with an annual output of over 17,770,000 barrels, of which about 10,500,000 barrels are exported.

SUNFLOWER SILAGE

Has Steadily Increased In Favor In the Prairie Provinces

There is little doubt now, that sunflowers are a fairly satisfactory and acceptable silage crop for districts in which seasonal conditions do not meet the requirement for good results with corn. In regions where the summer is cool the yield of corn is generally low, and where late spring and early autumn frosts are frequent the crop suffers considerable damage. In such districts sunflowers are generally a dependable crop. They also stand drought better than do corn or other silage crops. During recent years the acreage sown to sunflowers as a silage crop has steadily increased, particularly in the prairie provinces. Considerable data on the palatability and nutritive value of this silage has been collected by the Chemistry Division of the Dominion Experimental Farms and detailed in a bulletin on "Silage," distributed by the Publications Branch of the Department of Agriculture, Ottawa.

In regions where corn gives a satisfactory crop every year there is nothing to be gained by changing to sunflowers but in the colder climates of flowers; but in the colder climates of in Northern Ontario, and in the larger part of Quebec sunflowers are a more dependable crop than corn and make an excellent substitute. In nutritional value and palatability sunflower silage ranks high and its feeding value for milk production is very satisfactory.

In this connection it is interesting to note a series of feeding experiments with sunflower silage conducted at the Experimental Station at Kapuskasing in Northern Ontario, where fodder corn does not succeed. Sunflower silage in these experiments proved distinctly superior to oats peas and vetch silage for wintering both beef cattle and lambs.

It should be remembered that where there is no silo on a farm sunflowers cannot be grown to replace corn, as the latter crop may be fed as dry fodder a use to which sunflowers cannot be put.

Many an author's heaviest literary work consists of an effort to sell what he has written.

History Clearly Shows How Much America Is Indebted To England For High Ideals

Mayor Thompson of Chicago suffers from acute Anglophobia. His threatened auto-date of histories with an alleged British bias has provoked laughter on both sides of the Atlantic ocean. And yet Anglophobia must be popular in Chicago, or William Hale Thompson would not be its mayor. But however much he and his sympathizers may hate England, the frosty fact is that the United States owes its independence, its Constitution, its courts, its literature and language to England. Long before the Revolution the British Crown granted charters to colonists in America so wise, and just, that they became, with little change, the constitutions of Connecticut and sister commonwealths. All the fathers of the republic were of British stock—Washington, Adams, Jefferson, Hamilton, Franklin and Marshall. Of the same sturdy fibre was Benjamin Thompson, afterward Count Rumford, a physicist of supreme rank and vision.

John Harvard, an Englishman, founded the college which is today the acknowledged leader of American universities. Its most distinguished president was Charles William Eliot, whose forty years of service came to a close in 1909. As he strode across the campus he was as English in build and feature, in poise and dignity, as if this were his first morning in America. His native New England remains to this day true to the best traditions of her English forbears. In education, in letters, in fine art, in scientific research, she still bears the unchallenged primacy on this continent. Her technical schools, her studios of painting and sculpture, of music and the drama, her public libraries, serve as models when new foundations rise beyond her borders. The Atlantic Monthly, Webster's Dictionary, and the works of Francis Parkman are not published in either Chicago or New York.

As in literature, so, too, in the

sphere of organized religion. Among American churches the largest carries the banner of John Wesley. Next comes the church of John Bunyan. The Church of England in America, with a total not so large on its register, nevertheless wields a social acceptance not shared by any of her cousins. In colonial days the corporation of Trinity Church was established in New York. Its endowment in real estate has become of enormous value. Trinity church, early in its history, took part in founding King's College, now Columbia University, with more students than any other university in the world. To this day Columbia receives a goodly subsidy from the coffers of Trinity.

Visitors to Washington usually include the Smithsonian Institution in their itinerary. Its founder, James Smithson, was an Englishman, who left a fortune of about \$500,000 "for the increase and diffusion of knowledge among men." From his bequest has sprung the National Museum, in all likelihood to become the central home of industrial museums in New York, Philadelphia, Chicago and other leading cities of the Union.

However distasteful it may be to Mayor Thompson and his friends, the relations between England and her daughter nation, the United States, were never more cordial and friendly than today. In a golden treasury of good will, a little sounding brass from Chicago intrudes itself. But never in American hearts was the net balance at the credit of the Motherland greater than at this hour. This happy result is due, in part, to the Great War, when men in khaki north and south of the Canadian frontier joined hands to defeat the foes of mankind.

Winnipeg Newspaper Union

A Modish New Coat

Extremely smart is the coat shown here for the junior miss. The two piece sleeves are finished with shaped cuffs, and there are useful patch pockets and a long shawl collar. No. 1693 is in sizes 8, 10, 12 and 14 years. Size 10 years requires 2 1/2 yards 33-inch, or 1 3/4 yards 54-inch material, and the same amount of lining. Price 20 cents the pattern.

Every woman's desire is to achieve that smart, different appearance which draws favorable comment from the observing public. The designs illustrated in our new Fashion Book are originated in the heart of the style centres, and will help you to acquire that much desired air of individuality. Price of the book, 10 cents the copy.

(1) Standard 50 lb. Box of Apples.
(2) Typical Canadian Pacific Refrigeration Stowage Steamer.

Say It With Canadian Apples

This is the slogan of the Canadian Pacific Express Company for Christmas and New Year, and at the same time a patriotic appeal to Canadians to advertise the Dominion in the countries overseas. It will be agreed that there is hardly a better way to do it than by means of this distinctive Canadian fruit whose feel, scent, sight and taste satisfy so amply four of the five senses of the average man, woman and child. You can have what

sort you prefer though many people would have their wants fully met with a standard box of Macintosh Reds such as is shown in above illustration. Wherever you live, what you have to do is easy. Order from your grocer a standard box of apples weighing 50 lbs. and containing about 150 apples. Then get in touch with the Canadian Pacific Express Company, tell them you want to send it to such-and-such an address in England, Scotland, Ire-

land, France, or where you will, and they will do the rest. The fruit is guaranteed by Canadian Government certificate and it is carried overseas in refrigeration stowage by Canadian Pacific steamships. As to the cost, well to Great Britain it will cost you a good deal less than the apples themselves. And you will have sent friend or relative one of the most attractive presents it can be the luck of man to receive at Christmas or New Year.

LESSON No. 14

Question: Why is emulsified cod-liver oil so efficient and so beneficial a food- tonic?

Answer: Because it is so easily assimilated and quickly builds up strength. Multitudes use it every day as in

CHAPTER XIV—Continued.

In the evening they drove home, almost without speaking, but with hearts curiously knit together.

Every second Sunday Helmi had the afternoon to herself, and, without prearrangement, she and Jack took the trail to the Falls. Not a word of love had passed between them. They were just two good companions. Sometimes Helmi told him about Finland; sometimes he read to her; sometimes they sat still. But the day always held for Helmi a pleasure so keen, so piercing, it made her tremble.

The acutest part of Helmi's happiness centred around the little house which Jack was building. To please her he promised he would not work any more on Sunday. She loved to watch him from her bedroom window as he planed and sawed and hammered.

"He must be a good, that Jack Doran, to fit the boards so nice and make it all so well. He can't be bad like Aunt Lili said, or why should he want to build? In his spare time he works, while other men play cards and smoke and go to bar and drink. I think he must be good man, that Jack; I think I like that Jack Doran a pretty good lot!"

Jack's shift ended at four in the afternoon, and after he had changed his clothes he usually went to work at his house. Helmi often went over with him and helped to hold the boards while he planed them. Their conversation was limited. One day when he was putting in a window frame he said: "I don't mind working my eight hours while I have something nice to look forward to. I love making things, though perhaps if I had to do it, it would seem like work, too. Do you ever get fed up on dishwashing?"

"Gosh, yes," said Helmi, "but I try always to make them shine, and nothing is too hard if it can be well done."

There was a long silence then, broken only by the sound of planing.

"I don't know what I'll do when I get done with this," he said.

Helmi looked up in surprise.

"I believe I'll build another one down by the river. There's a big tree there on a high bank—I would like a house right beside it, and then I could

Motherhood!

Peterboro, Ont.—"Dr. Pierce's Favorite Prescription was very beneficial to me. I had become all run down, tired, weak and miserable, had no appetite and my nerves were all upset. I saw the 'Prescription' advertised as being helpful to prospective mothers so I decided to try it. It built me up, quieted my nerves, gave me an appetite and I got along fine the remainder of the time—was able to do all my own work. I had comparatively no suffering, and my baby was very strong and healthy."—Mrs. Lottie Murney, 301 Townsend St.

At all drug stores. Tablets or liquid. Send 10 cents to Doctor Pierce's Laboratory in Bridgeburg, Ont., for trial pkg. of tablets.

Would Not Accept Defeat

Young London Financier Recoups Fortune After Big Failure

Three years ago most of his friends regarded Mr. Clarence Hairy, a well-known financier of London, as a ruined man. Young as he was, they believed his career was, if not over, at least held up for a long period. A great company with which he was connected was wound up and Mr. Hairy shouldered debts of the company amounting to three-quarters of a million pounds.

But Mr. Hairy set to work quietly and has built up a new fortune. He has just started a big new London omnibus company to link up the many small independent companies now in operation. He has taken a share in several of the big drapery companies now in operation. He has taken a share in several of the big drapery amalgamations recently. One of his most spectacular enterprises was a big jute combine which he formed in Dundee.

Her Secret Beautifier

Envy of Her Friends

Miss C. Delano, Washington, writes:—"About two years ago I was bothered a great deal with a muddy, sallow and pimply skin. I found I could cover the blemishes with cosmetics, but this was only a temporary relief. My druggist recommended your purely vegetable laxative, and suggested my trouble might be constipation. After taking a short while I noticed a wonderful difference. My complexion has improved, also headaches, indigestion and biliousness never bothered me any more."

CARTER'S LITTLE LIVER PILLS
Sold all druggists 25c and 75c red pkgs.

against the blue; already the western breezes were soft as velvet as they went past the eaves, murmuring something very sweet and satisfying. In which disappointment and heartbreak had no place at all.

CHAPTER XV

Mrs. McMann and Bill Larsen, the bar-tender, having a common grievance, had become fellow-conspirators. They were consumed with one desire, though from widely different motives. Mrs. McMann feared the loss of the best girl she had ever had, and more than that, she resented the sincere respect and friendship the boarders had for Helmi. Here she was, a girl who simply stepped off the train without a reference or letter, and in less than a year was the most popular girl in the valley. When the Anglican Church, desiring to raise money for their incumbent's salary, had put on a contest in Eagle Mines, Bannerman, and Brule, running one girl in each place, Helmi had won in a walk. And there was something funny about the way she acted. Mrs. McMann confided in her friend Mr. Larsen, for when it was all over and the minister came to Helmi to find out where she came from, how long she had been in Canada and all that, she wouldn't tell him a thing, and begged him not to write anything about her in the papers. It was queer to see Helmi afraid of anything.

Bill Larsen looked as meditative as anyone could with Bill's cast of features. "There was a Milander girl in Winnipeg about a year and a half ago who raised a lot of grief," he said. "She was a hot socialist and got in jail, and all that. I remember the name, because I've had a lot to do with Finns one way and another down at Port Arthur. Of course it's a pretty common name—but Helmi wouldn't be afraid if she wanted to leave a rock."

Mr. Larsen's mind reverted to the unpleasant episode which marked the beginning of his acquaintance with Helmi.

Mrs. McMann was for direct action. "I think we'd better put it up to Jack straight, and see what he's going to do. I don't believe for one minute he intends to marry Helmi, but she thinks he does, and if he's foolin' her, she may kill him or herself. I knew a Finn girl once who drank lye because her fella didn't come to take her to a dance. They're high tempered and quick with a gun or anything that comes to their hand."

"I don't suppose she's told him a bit more about herself than she tells us," Mrs. McMann continued. "You see, she never writes a letter only to Fin-

Larsen admitted it.

"I don't suppose she's told him a bit more about herself than she tells us," Mrs. McMann continued. "You see, she never writes a letter only to Fin-

Larsen admitted it.

"I don't suppose she's told him a bit more about herself than she tells us," Mrs. McMann continued. "You see, she never writes a letter only to Fin-

Larsen admitted it.

Larsen admitted it.

"I don't suppose she's told him a bit more about herself than she tells us," Mrs. McMann continued. "You see, she never writes a letter only to Fin-

Larsen admitted it.

"I don't suppose she's told him a bit more about herself than she tells us," Mrs. McMann continued. "You see, she never writes a letter only to Fin-

land, and she didn't come straight from Finland here, that's sure enough. And where did she get the nifty clothes she brought here? It sure looks queer, and no one can get it out of her."

Mr. Larsen was unable to offer any advice. "She's a dandy girl, is Helmi," he said, "and I don't like to see her fooled. If she wants to get married

Mr. Larsen left the sentence unfinished.

"She'd be foolish to marry any man," said Mrs. McMann. "Here she is, pullin' down her twenty-five dollars a month, rain or shine, and lots of time to herself, and takin' lessons all the time. Gittin' married is a queer business, Bill. No one takes warning! I didn't, and she won't. It's like the pigs that stick their noses in the hot feed and go along squealing, and another and another does it—no one learns. But I think it's up to us to bring Jack Doran to a show-down, just to see what happens. I never was one that could bear suspense—I like to have a thing settled one way or another."

Bill admitted he was something of an out-and-outter himself.

(To Be Continued.)

Early Postal Items

Prove Interesting

Collection Of 100,000 New Being Catalogued In London

Some curious relics from early days, before letters could be sent for a penny, are in a collection of 100,000 items belonging to the Union of Postoffice Workers, which is being catalogued at London and for which a group of Americans offered £200,000.

The collection, which is the life work of A. V. Moreton, retired postman, won't go to America, but probably will be made a permanent post-office museum. It includes an original letter, dated May 24, 1639, written by Sir Edward Osborne to Colonel Fairfax at the time of the advance of the Royalists against the Scots. It had been mailed:

"With all possible speede.

"Hast, Hast, Hast.

"Post Hast, Hast.

"For Life."

Perhaps the earliest curious post receipt is for Normandy, dated 1537. Another interesting receipt is for a letter sent to Kent, for which the coach mail messenger asked Queen Elizabeth a fee of one pound.

Dairymen Solve Mystery

Find Jackdaw Removed Cardboard Tops From Milk Bottles

A successor to the Jackdaw of Rheims has been discovered. Its particular specialty is the removal, not of rings, but of cardboard stoppers from milk bottles.

For some time dairymen have been puzzled by the mysterious opening of bottles left on doorsteps of houses, so a watch was kept and it was discovered that a jackdaw descended in the wake of the milkman on his early rounds and was able to open as many as a dozen quarts in one street during the morning hours. The milk was untouched.

For Burns and Scalds.—Dr. Thomas' Electric Oil will take the fire out of a burn or scald. It should be at hand in every kitchen so that it may be available at any time. There is no preparation required. Just apply the oil to the burn or scald and the pain will abate and in a short time cease altogether.

Don't Expect Perfect Friends

We have to learn to do our loving in this world over a good many rough places and around a great many sharp edges. If we insist that our friends be made to order, we shall never have any friends. We must take people as we find them, and expend our desire for perfection in shaping the friendship we give rather than in expecting it in that which we receive.

Prefer Oil To Roses

This is the plowing season in the Valley of Roses in Bulgaria, but no plowing is being done near Kustendil, around the bushes that produce the famous attar, for the peasants are preoccupied with the fact that oil has been struck there.

Lilies of the valley will grow in the house planted in cocoanut fibre. Ask your seedman to procure a half dozen pipe for you and plant them in a small bowl.

Little Helps For This Week

And we have known and believed the love that God hath to us, God is love; and he that dwelleth in love dwelleth in God, and God in him.—1 John iv. 16.

They only miss The winning of that perfect bliss Who will not count it true that love, Blessing, not cursing, rules above, And that in it we live and move.

—Richard Cheever Trench

All you need strive for is to love God more, more snugly and simply; to still the human actings and impulses of your being Him. Love is of God; it is a divine gift. Do not seek to crush it; seek to keep it steadfast, and seek to help others by love, by letting their love for you draw them upward and closer to God, the Fount of all love.—Harriet Mossell.

EFFICIENCY IMPAIRED

Why Many Men and Women Are Badly Handicapped

When you are so run down in health that it impairs the efficiency of your work as well as your power to enjoy your leisure hours or obtain rest, it is time you looked to the cause. If you do not, a serious breakdown is almost sure to result sooner or later. In nearly all cases this condition, which doctors usually describe as general debility is due to poor blood—blood that is deficient in red corpuscles. When the blood is thin and weak your whole system suffers. You lose appetite, have no energy, your nerves trouble you and you feel restless.

What you need is help to build up your blood and you should begin at once to make your blood rich and red by taking Dr. Williams' Pink Pills. You will soon notice the difference in your health by a better appetite and increased vigor. The reason is that the new blood created by Dr. Williams' Pink Pills stimulates all the organs of the body to healthy activity, and so the system gains nourishment and strength. If you are weak or out of sorts begin gaining new strength today by taking Dr. Williams' Pink Pills.

You can get these pills from your druggist or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Convention At Calgary

It has been arranged to hold the National Convention of the Canadian Authors' Association in Calgary during the first week of July next year.

One of the commonest complaints of infants is worms, and the most effective application for them is Mother Graves' Worm Exterminator.

One pair of chiffon hose represents 112 miles of tiny silk threads. Most of this silk comes from Japan and China, and about a tenth of it from Italy.

Keep Minard's Liniment in the House.

Modern knowledge of astronomy and mathematics is all based upon principles discovered by the Chaldeans.

The Least Excitement Made Her Heart Palpitate and Flutter

Mrs. Ambrose Orser, Elginburg, Ont., writes:—"I suffered for some time with a bad heart which seemed to be controlled by my nerves. The least little excitement would cause it to flutter and palpitate, and at times I would have real bad spells. I suffered in this way for some time when, one day, I saw

advised, so decided to try them. I had only taken a few boxes when I noticed that I felt better, so I continued taking them and in a short time my heart felt entirely different."

Price 50c, a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

BABY CROSS ALL THE TIME

Eczema on Face and Body. Cuticura Heals.

"My baby's face and body were covered with eczema. It broke out in blisters and sore eruptions, and he could not sleep on account of the irritation. I had to keep mittens on his hands to keep him from scratching. He was cross all the time, and his clothing aggravated the breaking out."

"I used other remedies but they did not help him. I began using Cuticura Soap and Ointment and in a few days I could see a change, and in about a month he was healed." (Signed) Mrs. Katie Davidson, Flat Lake, Alta.

Cuticura Soap, Ointment and Talcum are ideal for daily toilet uses. Sample Each Free by Mail. Address Canadian Import: Blackman, Ltd., Montreal. Price, Soap 25c, Ointment 25c and 50c, Talcum 50c. Cuticura Shaving Stick 25c.
